

SEA CHASER DE LUXE II

— FIBREGLASS HULL —

SEA CHASER de luxe II is a comfortable and beautiful development from earlier models, which became immensely popular in Sweden, a record number of 1,200 having been sold.

The Sea Chaser meets the present-day demand for comfortable family cruising, combining outstanding seaworthiness and strong construction with smooth, modern lines.

Hull of fibreglass, cabin sides and interior of selected African mahogany, roof of fibre glass, ceiling covered with vinyl and deck of Bangkok-Teak. This is the Little Sister of the now famous Royal Cruiser, the same high standards of finish and workmanship being maintained. The attractive cabin contains two comfortable seat/berths. Centre section fills in giving possibility for third berth.

There is a separate toilet compartment and full length hanging locker.

The cockpit is very roomy with good stowage under the wide after seat; additional seating is provided by a hinged seat alongside the helmsman, giving a cushion covered bench seat across the whole width of the boat. The galley is ingeniously situated behind the helmsman's seat; it consists of stainless steel sink with fresh water pump, ice box, space for two-burner cooker and cupboards for crockery, pots and pans and food. Not only does the ship's cook avoid being 'out of the party' while preparing meals, but the placing of the galley on deck avoids all food smells in the cabin. The cockpit may with ease be completely closed in by a strong, well-fitting cover during bad weather or for privacy. This also allows for additional berths if required.

SEA CHASER DE LUXE II

A SAFE SEA-WORTHY BOAT FOR FAMILY CRUISING

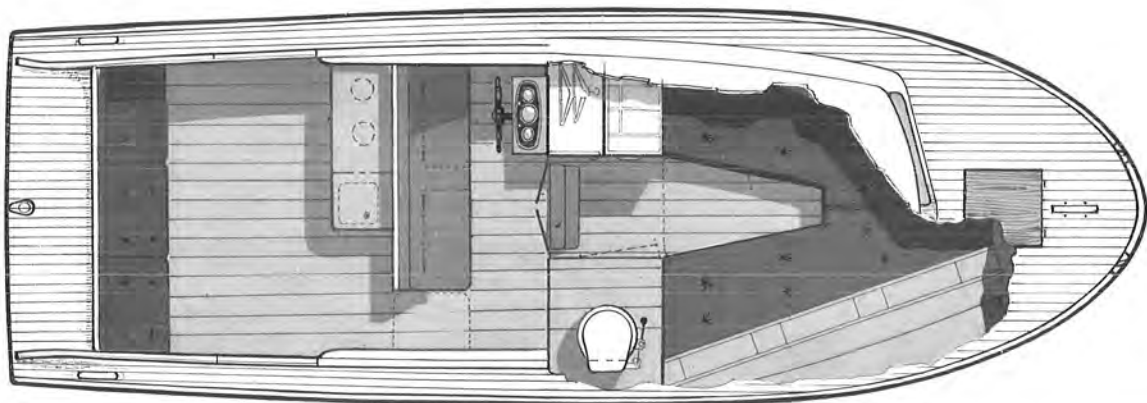

The pleasant cabin, which is light and airy, provides sleeping accommodation for two or three persons. There is useful stowage space behind the back cushions and under the berths.

SPECIFICATION:

L.o.a.	approx. 7,50 m.	25'
Beam	„ 2,60 m.	8' 6"
Draft	„ 0,60 m.	2'
