

Storebro Royal Cruiser 36

Harry A. Sührcke
Wandsb. Ch. 238, Tel. 203154
2000 Hamburg 76

A new cruiser from Storebro which combines traditional boat building with modern design and technology. In building the Storebro Royal Cruiser 36 we have utilised the experience gained over the past 30 years in building rugged and sea worthy craft, all of which are built to the meticulous standards demanded by Det Norske Veritas.

Storebro Royal Cruiser 36 – is built for sea going families, providing optimum comfort and space while in harbour, and maximum security at sea. The large aft deck is a sun bathers dream, sheltered from the wind, but completely open to the sun, providing a large area for relaxing and socialising.

The interior, you will find, is very spacious and designed with typical Scandinavian flair. The comfortable aft cabin has accommodation for 3 adults, with its' own separate toilet room and shower.

The large deck saloon is virtually as spacious as on the Storebro Royal Cruiser 40, again providing a good area for socialising and relaxing.

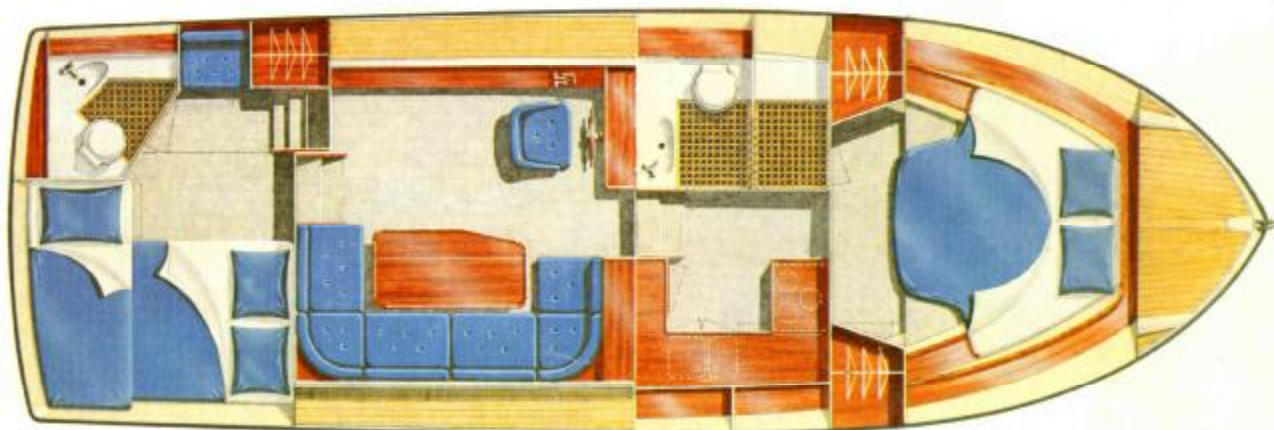

On this entirely new design, the owners' cabin has been located forward with a large double berth and access to separate toilet and shower cabin.

The galley has been designed with considerable thought to the requirements of cooking at sea with ample stowage space, large working surfaces, built in cutting boards, with everything readily to hand for the cook – Storebro Royal Cruiser 36 is a craft built for maximum safety and strength, a craft in which you can happily take to sea and make the most of your sea going life.

The hull of the Storebro Royal Cruiser 36 is designed for fast offshore providing a comfortable soft ride in short choppy seas.

By meticulous care in the hand laying of the glass reinforced plastic and utilisation of the well known integrated stringer system on extremely strong + rugged hull is produced, which is the hallmark of all Royal Cruisers.

powered by
VOLVO PENTA
diesel

STOREBRO ROYAL CRUISER 36 BALTIC

L.o.a	approx.	11.0 m
Beam	"	3.83 m
Draft	"	1.2 m
